

SLP

Pneumatic Sealless Combination Tool for Steel Strapping

Reliable and durable
All metal and alloy parts
provide long-lasting, low-
maintenance operation.

Easy manual slack pull
Reduces tensioning time.

Weighs less than 15 lbs.
Reduces operator fatigue in both the
vertical and horizontal positions.

Easy to operate and service
Front and rear strap guides assure
quick, easy loading and accurate strap
alignment. Punch, die, feedwheel and
cutter replacements can all be
performed in less than five minutes.

Specifications:

For use on 1/2" x .017" Apex®
through 3/4" x .025" Magnus®
strapping.

Tension: Up to 1,500 lbs.

Base Length: 5"

Weight: 14.8 lbs.

The SLP pneumatic sealless combination tool is designed for steel strapping in sizes ranging from 1/2" x .017" to 3/4" x .025" Apex® or Magnus®. Ideal for strapping lumber, panel, paper, brick and block, or metal products.

Compared to other tools in its category, the SLP is lighter and more durable. Its unique sealer die insert and triple face strap cutting blade also provide lower operating costs.
