

SPC₃₄₃₁

Pneumatic Sealless Combination Tool for Steel Strapping

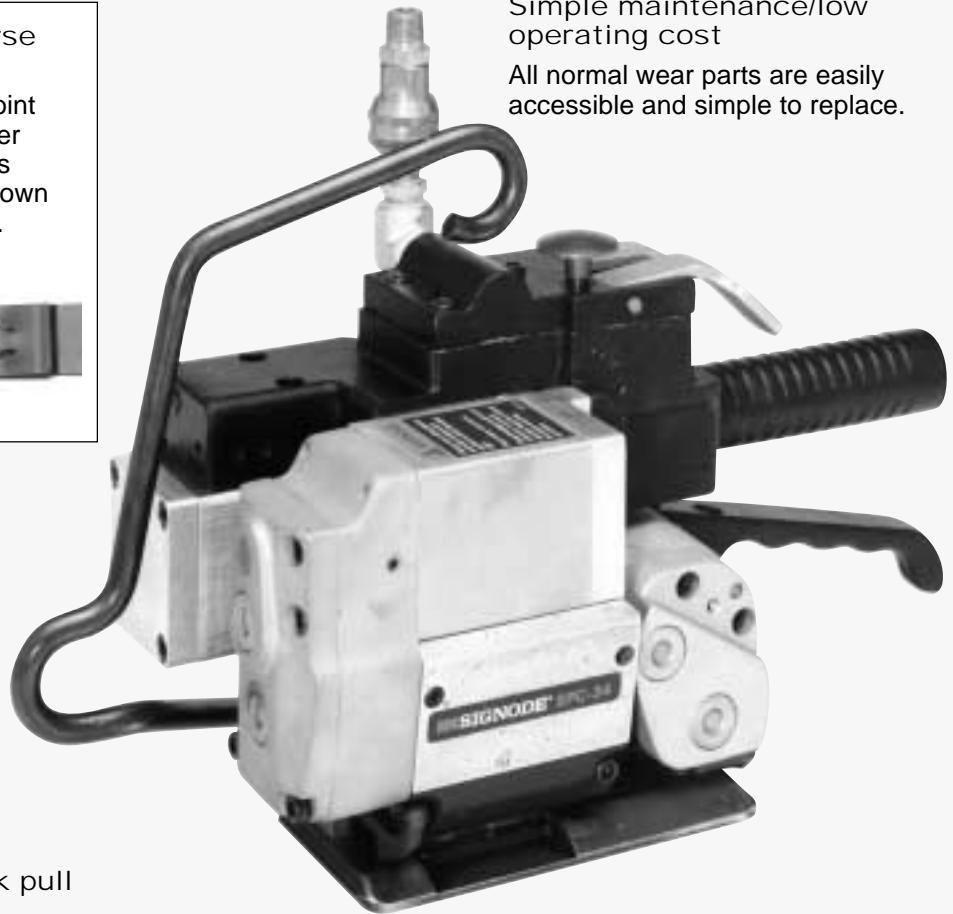

Fourth key reverse
lock joint

Prevents the strap joint
from opening in either
direction. Strap tail is
automatically bent down
to prevent snagging.

Simple maintenance/low
operating cost

All normal wear parts are easily
accessible and simple to replace.

Easy manual slack pull
Reduces tensioning time.

Made in the USA

Specifications:

For use on 3/4" x .025" to 3/4" x
.031" Magnus® strapping.

Sealing cycle: Less than one
second

Tension: Up to 1,600 lbs.

Weight: 24 lbs.

The SPC sealless combination tool is designed for Magnus® strapping in sizes ranging from 3/4" x .025" to 3/4" x .031". It is ideal for strapping lumber, panel, steel and other products.

Its unique sealer die insert and rotating triple face strap cutting blade provide lower operating costs than competitive models in this category. It is also the lightest weight tool in this category.
