

Lightweight design and ergonomic handle reduces operator fatigue

LED light illuminates seal area

Green/red LED battery light indicates charge level

Maximum portability... no cord, no hose

18 volt lithium-ion battery for long-lasting operation

240 single notches per charge

One-button operation

Strap detection system eliminates accidental cycling

WORLD'S MOST POWERFUL BATTERY-DRIVEN STEEL STRAPPING TOOL

Signode GripPack 114

IPS Part Number 354111

Battery Powered Sealer for Steel Strapping

Break free from the lack of portability and high weight associated with many pneumatic sealers. Our latest innovation, the GripPack 114 steel strap sealer, provides the low weight and portability that operators need but can't get with pneumatic sealers. The GripPack 114 delivers over 240 single notches per charge, giving you maximum power and performance without the air generation costs and inconsistencies of pneumatically driven tools.

The tool's lightweight, durable design makes it easy to handle and operate. With one-button operation and performance enhancing features not found on pneumatic tools, the GripPack 114 vastly improves the application of steel strapping in heavy-duty hand tool applications.

Specifications

Strapping: Magnus® or Apex Plus™ steel strapping

Strapping width: 1-1/4" x 0.025" to 0.031" (32 mm x 0.64 mm to 0.79 mm)

Joint type: Single reverse notch

Seal type: 114 P, 114 OF

Weight: 7.0 lbs. (3.0 kg)

Part Numbers

GripPack 114 kit

Sealer: 800250

Battery and charger pack: 800313

Spare battery and charger

Battery only: 800293

Charger only: 800294

Battery and charger pack: 800313
